CONFERENCE ANNOUNCEMENT AND CALL FOR PAPERS 1ST INTERNATIONAL TOURISM CONFERENCE

Beyond the boundary: Creating new epistemologies in tourism

8-11 December 2009, Bridgetown (Barbados)

Conference Organiser:
The Department of Management Studies
The University of the West Indies
Cave Hill Campus
Barbados

Rationale

Since the latter half of the twentieth century, the world has witnessed unparalleled change at both global and local levels with issues such as terrorism, globalisation, sustainability, climate change, poverty alleviation and migration assuming centre stage. The demise of the Soviet Union almost two decades ago seemed to sound the death knell of socialist experiments but the recent collapse of international and national financial markets have also brought capitalist systems into question. In this context it is clear that traditional ways of seeing and knowing no longer provide adequate explanations for the rapid pace of global and local change. Tourism, which represents the largest voluntary movement of

people across international boundaries, has not been untouched by these changes. While there have been some notable contributions with respect to critical approaches to tourism knowledge, there appears to still be a predominance of normative discourses and practices within tourism which fail to take account of, or even provide explanations of tourism within the context of rapid global and local change.

It is therefore becoming increasingly evident that there is a need to look 'beyond the boundary' of normative discourses and practices of tourism by embracing cross disciplinary perspectives which can provide more plausible explanations for tourism phenomena within the context of the 21st century.

Aim

Against this background, this conference seeks to cross the disciplinary divide and invites colleagues and students from the widest array of disciplines to explore tourism phenomena through new methodological, ontological and epistemological lenses. Ultimately it is hoped that this conference will in some way contribute to cross-disciplinary dialogues in tourism which can advance tourism knowledge and practice.
